Hacken: "Idea that will improve the crypto world."
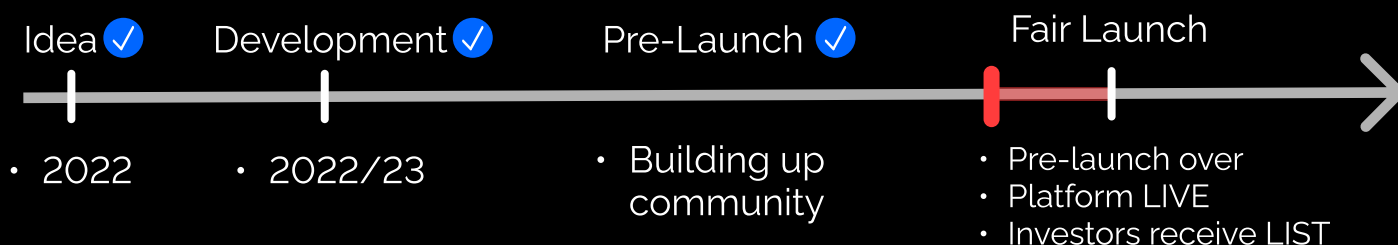

Short

Overview of our business & the benefits you can expect as an investor.

CoinMarketCap	CoinGecko	CryptoToday
Centralized	**Centralized**	**Decentralized**
Old system	Old system	New system
$5 B	$1 B	**?**

Decentralized tools WE WANT!!

Where is CryptoToday now?

Idea ✓	Development ✓	Pre-Launch ✓	Fair Launch
• 2022	• 2022/23	• Building up community	• Pre-launch over • Platform LIVE • Investors receive LIST

CryptoToday - Team of enthusiasts who simplified the whole crypto experience.

CRYPTO TODAY

Explanation

Our business?

• Coin listing platform

What is that?

• Tool **for researching** projects & reading crypto news

Why do **visitors** use it?

• **To form a better opinion** about which projects to invest in.

Best platform in the industry?

• Simple one, while info is both transparent & accurate

CRYPTO TODAY

Which platform wins?

Before we compare platforms, here is

The right way how to filter future "gems":

Heard/found a **project**?

• Idea **understandable**?

• Which **industry**?

• Does it solve **Problems** that competition ignore?

• Is it **Web3**?

So, if **Vision** looks promising

Check before investing:

• **Product**: ready / not

• **Tokenomics**: max supply limited? Is it audited?

• Red flags? Check if others **found**? - reddit etc.

• Quality of **Admins**?

• **Info** up-to-date?

Two different ways "how to filter future gems":

ⓜ CoinMarketCap

- Admins make decisions
- Info not accurate
 (admins are too slow)

🄴 CRYPTO TODAY

- Decentralized, (web3 voting)
- Info instantly updated
  (community is rewarded
  to update info)

Valuation

$5 Billion

$? Billion

Real losers?

• Platforms with **poor user experience**

• Platforms with **questionable transparency**

• Investors who **can't recognize** winning projects

We invite You to join our free telegram channel & support our mission.

If you recognize CryptoToday as a **winning** project - invest while the pre-launch phase is ongoing, (before others).

CryptoToday investors - LIST token:

You get LIST (at fair-launch).
Users will buy **Premium options** with LIST & that sum gets burned. (**reducing** the LIST max supply)

USDT / LIST swap will be at www.cryptotoday.com

So, **if the platform is useful & user friendly**;
More and more users will **prefer us** over others & less and less LIST tokens will exist.
So LIST price will skyrocket.

Fair-launch will be announced in our TG channel.

P.S. The most brilliant ideas are always simple!
